RICHARDSON TIMBERS

Custom Timbers Since 1949

Red Cedar can be used for siding, decking, fencing, gazebos, sheds, doors, windows, blinds, shutters, indoor/outdoor and much more. Compare Red Cedar to the competition. Discover more about Red Cedar's unique beauty, history and environmental benefits.

- Appearance - For centuries builders and artisans have valued Western Red Cedar for its natural beauty.
- Durability - The hallmark characteristic of Western Red Cedar, its natural durability, has preserved examples of native culture for more than 100 years.
- Dimensional Stability - Red Cedar offers excellent stability because of its low density and low shrinkage factor.
- Workability - Cedar is easy to cut, form, glue and finish.
- Natural Preservative - Cedar contains natural preservatives that resist moisture, decay and insect damage.
- All-Weather - Cedar is naturally at home in the sun, rain, heat and cold all year round.

The timeless aesthetics of Western Red Cedar make it the primary choice of those who are looking for beauty and warmth in wood timbers. Cedar is perfect to use no matter what the architectural style is, from rustic to contemporary.
