RICHARDSON TIMBERS

Custom Timbers Since 1949

For versatility and beauty few woods in the world match the magnificence of Douglas Fir. It's light rosy color is set off by its remarkably straight and handsome grain patterns.

- Douglas Fir is North America's most plentiful softwood species, accounting for one fifth of the continent's total softwood reserves.
- Unique among all softwood species, it is naturally dimensionally stable, having the ability to season well in position.
- It is universally recognized for its superior strength-to-weight ratio. Its high specific gravity provides excellent nail and plate-holding ability.
- Douglas Fir is one of the few species available in large sizes from managed timberlands. It is preferred for heavy timber framing and large members are available in a variety of grades manufactured for construction uses where larger material is needed to meet the engineering requirements of the design.
- Douglas Fir lumber is often selected for metal plate-connected trusses and other engineered applications. It is also used for floor and ceiling joists and rafters.

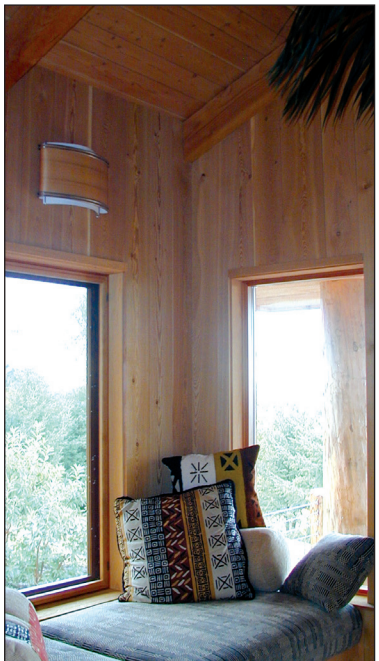

Designers appreciate the rich visual quality of Douglas Fir texture and grain as well as its beautiful response to fine craftsmanship and finishing.

#1 & Better Green Douglas Fir
Sizes up to 20″ x 20″ – lengths up to 40 ft.

FOHC

4 x 6	8′ thru 24′	6 x 10	8′ thru 24′
4 x 8	8′ thru 24′	6 x 12	8′ thru 40′
4 x 12	8′ thru 24′	8 x 8	8′ thru 40′
6 x 6	8′ thru 24′	8 x 10	8′ thru 40′
6 x 8	8′ thru 24′	8 x 12	8′ thru 40′

BH

12 x 12	8′ thru 40′	12 x 16	8′ thru 40′
