

TRU-RUFTM SURFACING is an addition to rough timbers, green or kiln dried, that provides a unique texture to the timber.

For the dealer, this means a product upgrade that removes common material handling problems like band marks or strap marks from sawmill handling, weather or mill stains during order fabrication. **TRU-RUFTM SURFACING** can be used on any species of wood Fir, Cedar, Cypress and many more.

Before **TRU-RUFTM**

After **TRU-RUFTM**

For your customer, **TRU-RUFTM SURFACING** means a job site ready product requiring no site touch up before installation, but with a textured finish the consumer expects. All four surfaces are usable every time.

Because a **TRU-RUFTM** timber provides greater customer satisfaction, costly material returns are greatly reduced, and customers will ask for that special surface on all their orders.

When the job needs a special timber and that extra finish to insure customer satisfaction, let the **TRU-RUFTM SURFACING** make the difference.
